Catalog User Guide
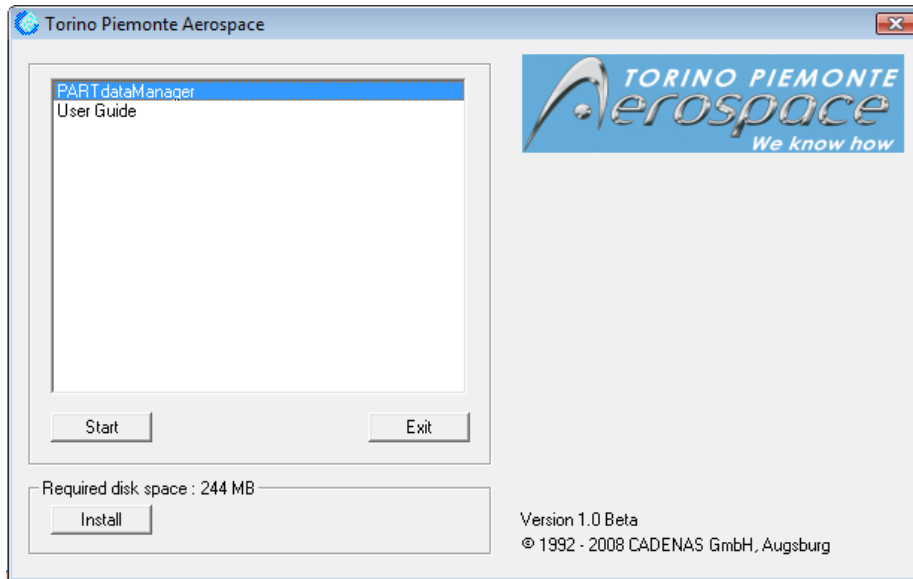

START THE CATALOG BROWSER

1) Run CdStart.exe inside folder "software"

2) Automatically the PARTDataManager application starts.
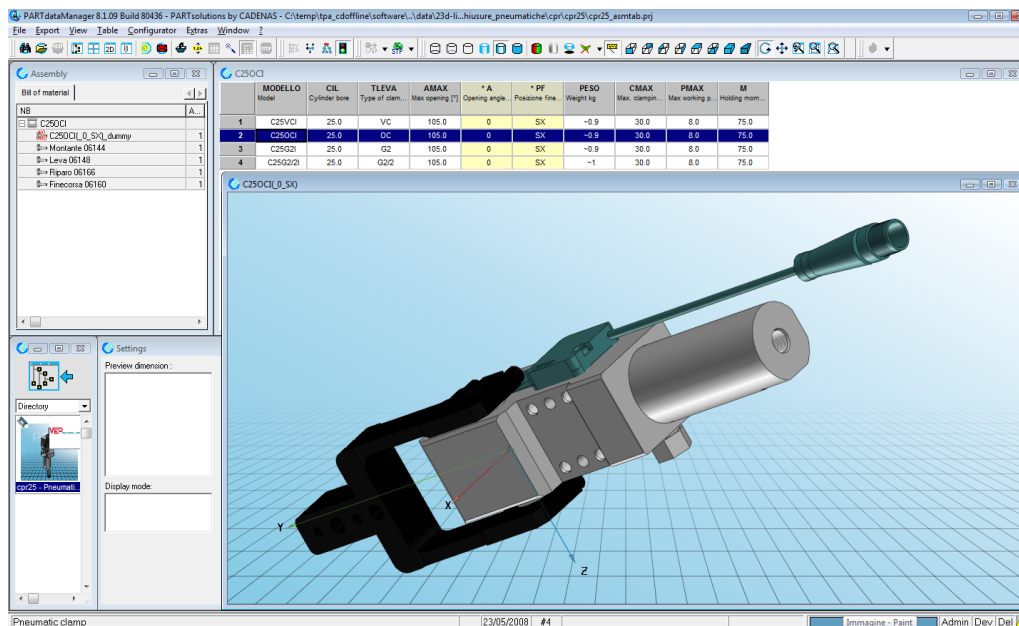

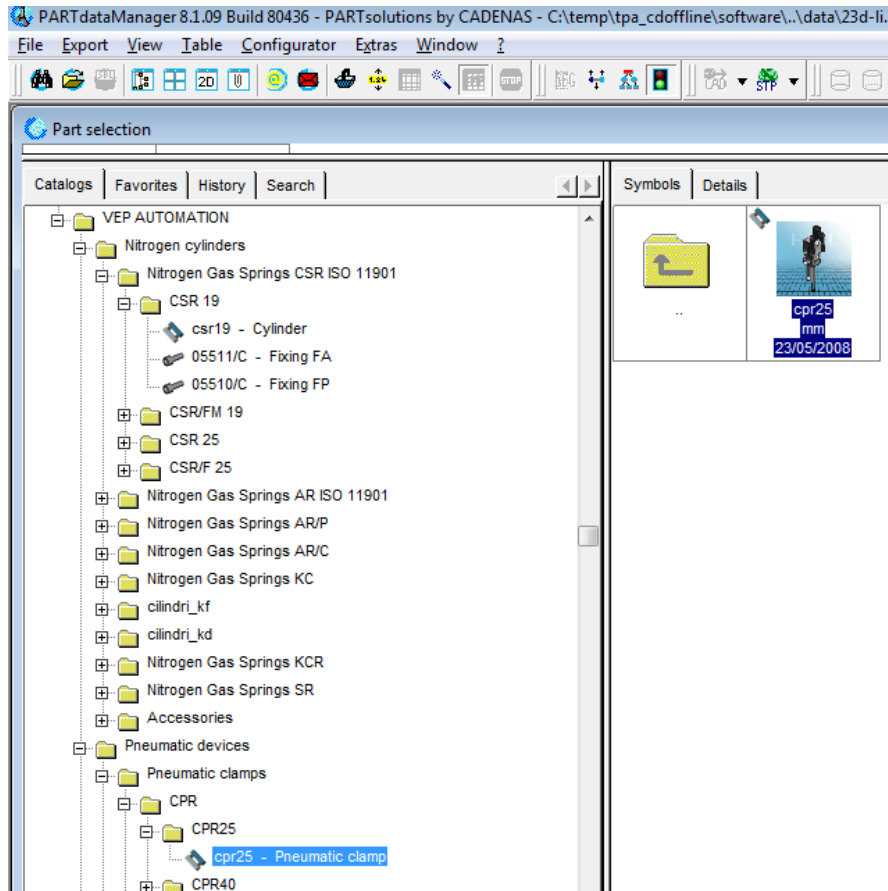

NAVIGATE THE ASSISTANT

1) If the web page doesn't automatically starts then from PartDataManager catalog structure double click on "START" icon to launch the catalog assistant.
2) The catalog assistant is a web page so you can navigate through the link to access all the information.

NOTE: when the internal pages of each company are clicked then is open a new browser window. If you close that browser you cannot go back via the "Home" link, then the only way is right-click on the page and select the command "rückwärts" (it's german and it means "Back")

DOWNLOAD 3D-2D CATALOG COMPONENT

1) Enter in a catalog page and select a component inside the table (see images below)

2) Then after the component selection click on export Menu an select the format to download

3) If you need a 2D view you after the selection you have to click on "2D view" button.

4) Then select the view and export it from Export Menu

5) To retun to assistant navigation press the "Assistant button"

6) To navigate manually the catalog structure press the "Navigation button"
