

iglidur® JATM/VATM – Matching sliding Surfaces

Maintenance-free plain bearing system

For high performance

Matching sliding surfaces

Predictable service life

iglidur® JATM/VATM

Fax +49 - 22 03 - 96 49-334

iglidur® JATM/VATM consists of an anodized aluminium ring combined with an iglidur® bearing ring. This combination of materials results in low friction values and high wear resistance – without lubrication.

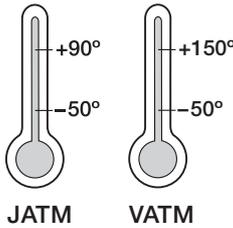

iglidur® JATM/VATM

igus® GmbH
51147 Cologne

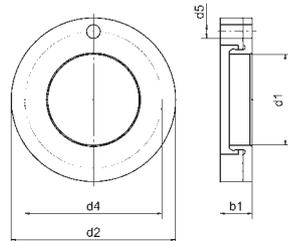

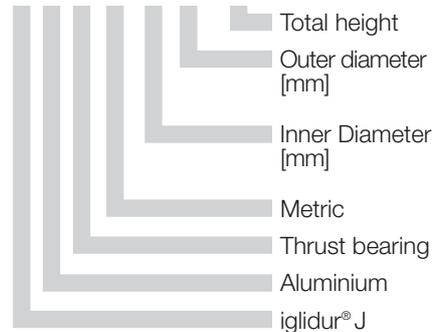

Material:
iglidur® J
▶ chapter 3
iglidur® V400
▶ chapter 21

Special properties:

- Maintenance-free bearing system
 - For high performance
 - Matching sliding surfaces
 - Predictable life time
 - Material: iglidur® J ▶ chapter 3
 - High-temperature version available: VATM, iglidur® V400 ▶ chapter 21
- Further dimensions and delivery on request

The calculated rates of wear rates of thrust bearing JATM

Graph 37.1: The graph shows the effect of pressure (p in MPa) and speed (v in m/s) on the thrust bearing wear

Calculated friction value of thrust bearing JATM

Graph 37.2: In a test, the friction values of the bearing systems were calculated at different speeds (v) and pressures (p) – (v in m/s, p in MPa)

We welcome your request for a thrust bearing customised for your application.
